Datex FootPrint® WMS

Cloud and SaaS Solutions

Looking for a warehouse management system that is faster to implement with a lower predictable cost? Our new Cloud solutions enable businesses of any size and complexity to have browser based access to a state-of-the-art WMS with robust functionality at a more affordable price. Datex FootPrint WMS Cloud and SaaS Solutions give your business the tools needed to operate efficiently, securely and reliably.

Why Cloud?

- Global access to inventory information 24/7/365
- Browser based on demand system is easy to access and use
- Reduced deployment time
- Improves communication and collaboration
- Reduces IT burden
- Lower upfront investment
- Facilitates seamless flow and sharing of data
- Provides unlimited storage space

Leave IT to the Experts

- No need to maintain or upgrade your WMS
- Backups, recovery and upgrades are provided

Cloud System Benefits

- Lower system introductory cost
- Faster system implementation time
- Hassle free system allows your company to focus on core competencies
- Faster upgrades
- Conserve internal resources for other projects
- Saves business capital for other purposes
- Maximum uptime allows targeted focus on new business
- Reduced hardware & maintenance costs
- Quick Return on Investment

With the implementation of Datex FootPrint WMS Cloud Solutions, your company can be confident that all data will be safely stored and immediately accessible. Datex FootPrint WMS Cloud Solutions include all of the same functionality as the WMS on premise version and the ability to access the system from anywhere from many types of devices.

Who Needs the Datex Cloud Module?

- Third Party Logistics Providers (3PLs)
- Warehouses
- Distribution Centers
- Fulfillment Centers
- Manufacturers
- Vault Management Companies

Datex FootPrint WMS cloud solutions are offered in three different tiered levels with varying levels of control, service and security.

Datex Footprint® WMS SaaS Edition

With this option, expect solid core functionality at a low initial investment. Ideal for start-up businesses or those with less complex needs, this edition includes business essential features, standard reports and much more.

Datex Footprint® WMS Flex Cloud Shared Edition

Developed for medium to larger businesses, the Flex Cloud Shared Edition contains added WMS functionality as well as editable security and admin rights, customizable reporting, workflows, labels, documentation and more. APIs and integrations are available. As an option, companies may purchase Flex Cloud Edition user licenses.

Datex Footprint® WMS Flex Cloud Enterprise

Flex Cloud Enterprise provides the highest level of system redundancy and security protocol to guarantee customer data privacy, data control and system uptime.

Here are some of the additional measures Datex has put into place for the Flex Cloud Enterprise Edition:

✓ Contracted with highly secure data centers that utilize state-of-the-art electronic surveillance, 24x7 trained security guards and multi-factor access control systems

✓ Contracted with data centers that have environmental systems designed to minimize the impact of disruptions to operations

✓ Positioned in multiple geographic regions & Availability Zones to ensure resiliency in the face of most failure modes including natural disasters or system failures

✓ Utilize virtual infrastructure designed to provide optimum availability while ensuring complete customer privacy & segregation

✓ Contracted with certified data centers that meet a variety of industry standards and use independent auditors to verify compliance
